Welcome to the LMN Tool!

A tool that allows stakeholders to design and optimize their neighborhoods

WHAT DO YOU HAVE IN MIND?

Existing Neighborhood

New Neighborhood

Get Started →

Layer 1: Neighbourhood Results

Explore the compatible neighbourhood configurations referencing your selected parameters.

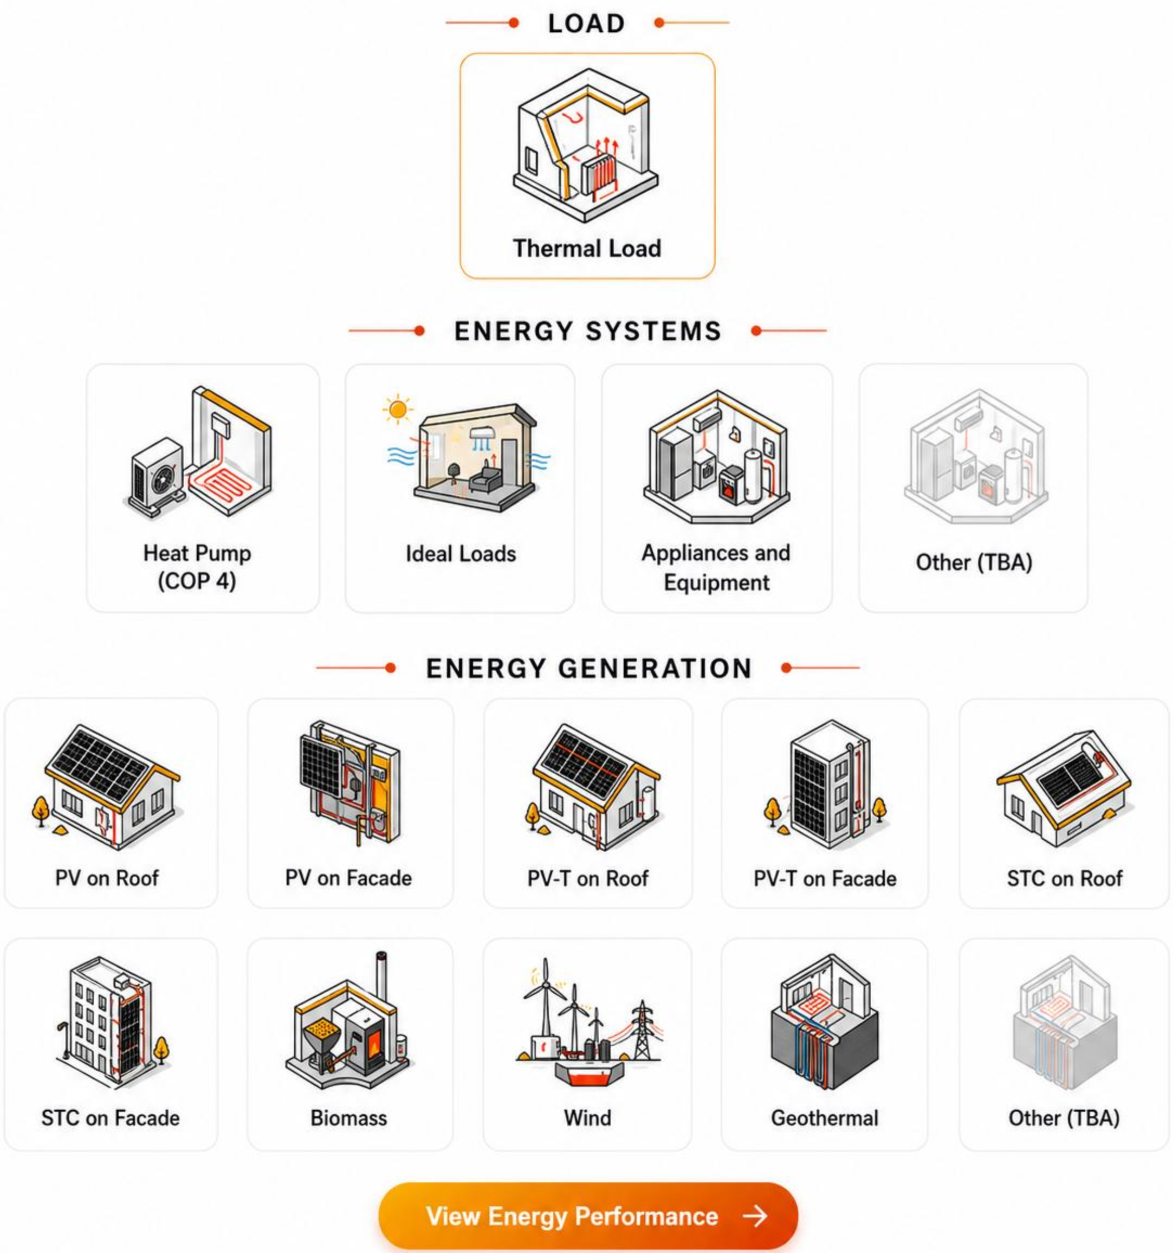
Back to Parameters

Layer 2: Energy Selection

CONCEPTS	NEIGHBOURHOODS	PROPERTIES	BUILDINGS
 *Rural Cluster*	 **RC-R**	residential, rural, curvilinear, low, high-performance construction	 Two-Storey House
 *Suburban Outer*	 **RC-D**	residential, suburban, curvilinear, low, high-performance construction	 Two-Storey House
 *Townhouse Cluster*	 **RC-T**	residential, suburban, curvilinear, low, high-performance construction	 Attached House

Layer 2: Energy Design Interface for RC-R

Select energy and generation parameters for your analysis.

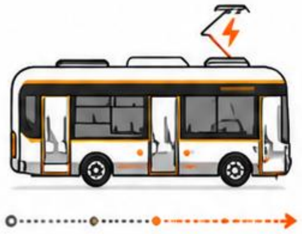


Layer 3: Mobility Selection for RC-R

Select mobility and transportation parameters for your analysis.

TRANSPORTATION

EV



EV Public Transport

EV Charging Stations

V2G Stations

MOBILITY

Bicycle Infrastructure

Pedestrian-Oriented Design

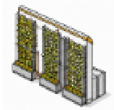
View Mobility Performance →

Layer 4: Green Selection for RC-R

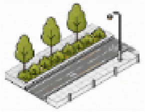
Select green infrastructure and urban agriculture parameters for your analysis.

INFRASTRUCTURE

Green Roofs



Vertical Greening Systems



Linear Greenery

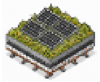
Green Spaces

URBAN AGRICULTURE

Roof Gardens

Food Gardens

ENERGY-INTEGRATED GI



PV-Green Roofs Integrated Modules

Landscape PV
